

STATE OF CALIFORNIA  
STATE WATER RESOURCES CONTROL BOARD  
DIVISION OF WATER RIGHTS

**ORDER**

APPLICATION 24691B

PERMIT 17587B

LICENSE \_\_\_\_\_

**ORDER CORRECTING THE DEVELOPMENT SCHEDULE AND  
AMENDING THE PERMIT**

**WHEREAS:**

1. Permit 17587 was issued to Vinifera Vineyards and was subsequently assigned to Beckstoffer Ranches, Incorporated.
2. Permit 17587 was separated into Permits 17587A and 17587B pursuant to Section 690.5, California Administrative Code, Title 23, Waters by an Order issued March 27, 1985 by the State Water Resources Control Board, Division of Water Rights.
3. The Order approved a new development schedule for Permit 17587B, allowing the Permittee until December 1, 1993 to complete application of water to the proposed use in compliance with guidelines for considering Petitions for Extension of Time adopted by the State Water Resources Control Board.
4. Paragraph 7 of Permit 17587B reads, "Complete application of the water to the authorized use shall be made by December 1, 1995."

**NOW, THEREFORE, IT IS ORDERED THAT:**

1. In compliance with an Order issued March 27, 1985 by the State Water Resources Control Board, Division of Water Rights, Paragraph 7 of Permit 17587B is amended to read as follows:

COMPLETE APPLICATION OF THE  
WATER TO THE PROPOSED USE  
SHALL BE MADE ON OR BEFORE

December 1, 1993

Dated: APRIL 22 1985

PERMIT FOR DIVERSION AND USE OF WATER

PERMIT 17587B

Application 24691B of Beckstoffer Ranches, Inc.  
C/O Drew Aspegren, Napa Valley Vineyard Co., P. O. Box 403  
Rutherford, California 94573

filed on September 19, 1974, has been approved by the State Water Resources Control Board SUBJECT TO VESTED RIGHTS and to the limitations and conditions of this Permit.

Permittee is hereby authorized to divert and use water as follows:

1. Source:

1. Ackerman Creek

2. Unnamed Stream

Tributary to:

Russian River

Ackerman Creek

2. Location of point of diversion:	40-acre subdivision of public land survey or projection thereof	Section	Town- ship	Range	Base and Meridian
1. North 85°30'West, 2,880 feet from SE corner of projected Section 6	SE $\frac{1}{4}$ of SW $\frac{1}{4}$	6	15N	12W	MD

County of Mendocino

3. Purpose of use:	4. Place of use:	Section	Town- ship	Range	Base and Meridian	Acres
Frost Protection	SW $\frac{1}{4}$ of SW $\frac{1}{4}$	5	15N	12W	MD	15
	S $\frac{1}{2}$ of SE $\frac{1}{4}$	6	15N	12W	MD	60
	S $\frac{1}{2}$ of SW $\frac{1}{4}$	6	15N	12W	MD	30
	N $\frac{1}{2}$ of NE $\frac{1}{4}$	7	15N	12W	MD	3
	NW $\frac{1}{4}$ of NW $\frac{1}{4}$	8	15N	12W	MD	2
					Total	110

The place of use is shown on map filed with the State Water Resources Control Board.

5. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed 2.45 cubic feet per second by direct diversion from March 15 to June 15 of each year for frost protection purposes. The total amount of water to be taken from the source for all uses under this permit and Permit 17587A shall not exceed 221 acre-feet per water year of October 1 to September 30.

6. The amount authorized for appropriation may be reduced in the license if investigation warrants.

7. Complete application of the water to the authorized use shall be made by December 1, 1995.

8. Progress reports shall be submitted promptly by permittee when requested by the State Water Resources Control Board until license is issued.

9. Permittee shall allow representatives of the State Water Resources Control Board and other parties as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit.

10. Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) to installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation. The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.

11. The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Resources Control Board if, after notice to the permittee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot be achieved solely through the control of waste discharges.

12. The State Water Resources Control Board reserves jurisdiction to impose conditions to conform this permit to Board policy on use of water for frost protection. Action by the Board will be taken only after notice to interested parties and opportunity for hearing.

13. For the protection of fish and wildlife, permittee shall during the period: (A) from March 1 through May 31 bypass a minimum of 2 cubic feet per second, (B) from June 1 through June 15 bypass a minimum of 0.5 cubic foot per second. The total streamflow shall be bypassed whenever it is less than the designated amount.

14. No water shall be diverted under this permit until permittee has installed a device, satisfactory to the State Water Resources Control Board, which is capable of measuring the flow required by the conditions of this permit. Said measuring device shall be properly maintained.

15. In accordance with Section 1603 and/or Section 6100 of the Fish and Game code, no water shall be diverted under this permit until the Department of Fish and Game has determined that measures necessary to protect fishlife have been incorporated into the plans and construction of such diversion. The construction, operation, or maintenance costs of any facility required pursuant to this provision shall be borne by the permittee.

**This permit is issued and permittee takes it subject to the following provisions of the Water Code:**

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).
